### DETAILED ACTION

1. Claims 3, 4, 11, and 12 are pending in this application. Amended claim 3 and cancelled claims 9, 10, 13, and 14 have been noted. The amendment filed 2/25/2008 has been entered and carefully considered.

#### *Response to Arguments*

2. Applicant's arguments, see p. 7, filed 2/25/2008, with respect to claims 3, 4, and 9-14 have been fully considered and are persuasive. The rejection of claims 3, 4, and 9-14 has been withdrawn.

Applicant argues that according to the jig of Nishiuchi, ring-shaped targets cannot be disposed concentrically with respect to the center axis of the disc-shaped magnet because the hanger members are supported circumferentially outside the rotary shaft of the support member 157. The examiner agrees. Nishiuchi would not be able to support oppositely-disposed targets wherein said targets are disposed **concentrically** with respect to the center axis of the disc-shaped magnets because the support member 157 (Fig. 6) would obstruct the deposition of material onto said magnets.

#### *Allowable Subject Matter*

3. Claims 3, 4, 11, and 12 are allowed.

The following is an examiner's statement of reasons for allowance: The closest prior art does not teach placing the electrode wire between opposite-disposed targets, wherein the targets are disposed concentrically with respect to the center axis of the disc-shaped magnet, the electrode wire extending and being fixed on a rotation shaft of a motor located outside of one of the targets.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
